

Devon Johnson

Frontend Software Engineer

Miami, FL | 239-823-8693 | www.devonjohnson.io | dlfjohnson@outlook.com | [LinkedIn](#)

SKILLS

- JavaScript | TypeScript | Node | Express | MySQL | PostgreSQL | React | Next JS | React Native | Redux | Angular | jQuery | HTML
- CSS | SCSS | BEM | Bootstrap | Tailwind | Material UI | KendoReact | Framer Motion | Storybook | Invision | Figma | Jest | Enzyme
- React Testing Library | Swagger API | Google Analytics | LaunchDarkly | CI/CD | Jenkins | Webpack | Babel | AWS | Vercel | Git Flow
- Github Flow | SonarQube | Jira | Bitbucket | Frontend | Responsive Web Design | Web RTC | SAAS | OOP | TDD | SDLC | SSR

EXPERIENCE

ChenMed

Miami, FL

Associate Software Engineer, Clinical Apps Team

07/2017 – 11/2023

- Developed multiple enterprise-level applications for a billion dollar healthcare company, driving the operations of 120 medical centers nationwide using the latest technologies of JavaScript, Node, React, Redux, TypeScript, HTML, SCSS and Material UI.
- Migrated applications from Angular to React by converting legacy component functionality to new React components through a gradual migration process. This work significantly improved scalability and overall application performance with a 35% decrease in load times.
- Collaborated with a team of 5 designers to translate design concepts into interactive, pixel-perfect user interfaces, modernizing the existing platform and increasing user satisfaction scores by 25%.
- Designed and implemented custom component libraries with Material UI, KendoReact, and Storybook, reducing development time by 40% and ensuring consistent design patterns across 9 applications.
- Created API proxies using Node.js and Express.js, boosting team velocity by 30% and reducing development time through enhanced frontend-backend collaboration.
- Resolved critical software errors across development, staging, and production environments, reducing system downtime and improving overall user satisfaction.
- Integrated third-party software solutions into internal applications using JavaScript and advanced DOM manipulation, enhancing product feature sets and user experience.
- Conducted bi-weekly demonstrations of new features to cross-functional teams and stakeholders, improving stakeholder engagement.
- Mentored junior and mid-level developers, fostering professional growth and improving team competency through targeted task assignments, comprehensive code reviews, and consistent feedback.

PROJECTS

- Edgewater Smoothie App: A mobile responsive web application for a local beverage company (Next, Tailwind, Vercel, Stripe). 01/2024
- Auto Marketplace: E-commerce platform designed to streamline the process of buying and selling cars (React, Node, Express). 04/2024

EDUCATION

Wyncode Academy

Miami, FL

Full Stack Web Immersive

2016

- Languages: HTML5, CSS3, Ruby, JavaScript
- Frameworks: Ruby on Rails, Bootstrap
- Technologies: Git, Terminal.app, IRB, jQuery, Sinatra, Heroku
- Database: Postgres, SQL

Rollins College

Winter Park, FL

Bachelor of Arts in International Business

2014
